## RELIABILITY

GERM FREE

WATER RESISTANT

FIRE RESISTANT

## ALL IN 2.8

## MILLIMETERS- AND HALF THE WEIGHT

We have compressed the beauty of marble into only 2.8 millimeters and half the weight for your convenience. While the Stone base panel provides the strength and rigidity for the material, the pattern foil introduces the pristine beauty of the natural stones. Finally the UV layer provides a high quality, polished surface which can be easily cleaned and maintained. The protective film protects the surface during handling and installation and is removed after the panel is installed.

**Stone wall panels are completely rigid just like regular ceramic tiles or marble and they can be used both on walls and ceilings.**

# OUR NORDIC SELECTION

Our Nordic selection aims to create elegant and spacious interiors through simplicity—creating living spaces full of light and grace. With the contrasting yet still natural color palette, you can create a greater sense of depth for cozy winter nights and joyful summer days.
